EDUCATION

Lovely Professional University *Aug 2023 – Aug 2027*

B.Tech in Computer Science and Engineering | Punjab, India

PROFESSIONAL EXPERIENCE

BEIYO *Jun 2025 – Sep 2025*

Data Science Intern

- Integrated rental data from 99acres, NoBroker, and NestAway with AISHE/UGC, State IT Portal, and Census of India datasets to identify high-potential PG outreach locations.
- Collected, cleaned, and preprocessed multi-source data using Python; performed EDA and feature engineering to develop Affordability and Demand scores combined into a Viability Index.
- Developed an XGBoost based PG occupancy prediction model to evaluate location demand across target cities, delivering **87% prediction accuracy** in estimating expected PG occupancy trends.
- Presented insights through geospatial heatmaps and an interactive Streamlit dashboard., enabling data-driven decisions for targeted PG expansion and outreach strategy.

Technical Skills: *Python, Pandas, NumPy, XGBoost, GeoPandas, Folium, Streamlit*

PROJECTS

Customer Retention Intelligence & Revenue Risk Dashboard | Live Demo | GitHub *Oct 2025 – Dec 2025*

- Developed an end-to-end analytics platform using Streamlit and Plotly, visualizing real-time risk patterns across **10,000+ customer records** to drive data-informed retention strategies.
- Engineered a hybrid predictive model combining XGBoost and Artificial Neural Networks, achieving a ROC-AUC score of **0.88 and 86% prediction accuracy**. in identifying high-value customer attrition risks.
- Designed a dynamic Financial ROI Engine to calculate Customer Lifetime Value (CLV), enabling a strategic path to reduce revenue churn by **30%** through targeted interventions.

Technical Skills: *Streamlit, XGBoost, TensorFlow, Plotly*

VisionGuard: AI-Powered Industrial Safety System | GitHub *Jun 2025 – Jul 2025*

- Designed and trained a 4-layer CNN in TensorFlow on a custom dataset of **2,000+ images**, using data augmentation techniques to improve model generalization.
- Engineered a real-time detection pipeline using OpenCV and HSV Color Calibration, achieving **85% accuracy** by precisely tracking hand contours in diverse lighting conditions.
- Implemented a virtual safety barrier using Euclidean distance logic, triggering real-time Safe, Warning, and Danger alerts with low-latency webcam processing.

Technical Skills: *TensorFlow, OpenCV, CNN, Euclidean Distance*

SKILLS

Concepts: Data Preprocessing, EDA, Feature Engineering, Model Evaluation, Deep Learning (CNN, ANN, RNN, LSTM), Machine Learning, Computer Vision, NLP

Languages & Frameworks: Python, C++, Java, HTML, CSS, Streamlit, TensorFlow, Flask

Tools & Platforms: Jupyter Notebook, Google Colab, VS Code, MySQL, Git, GitHub, GeoPandas, Folium, Plotly, Devops

CERTIFICATIONS

- Master Generative AI – Udemy
- AI Essentials – Udemy
- Build AI-Powered Apps – Infosys Springboard

EXTRA CURRICULAR

- **Secured 1st position** in the Robotics Quiz organized by RTRA, competing among 110+ participants.
